

## Prompt:

Create a one-page professional resume using the following details:

Name: Julian Perry R. Muñoz

Email: [jprmunoz@addu.edu.ph](mailto:jprmunoz@addu.edu.ph)

Phone: 09773318487

Education: Bachelor of Science in Information Technology

Ateneo de Davao University – 2nd Year

Skills: Python, Java, HTML & CSS, MySQL, Basic Networking, MongoDB, Rust

Projects/Experience:

- Student Enrollment System (Python, OOP)
- Shopping System (Console-based program)

Achievements:

- Academic Achiever

Use a clean, modern, and professional format. Keep it concise and suitable for entry-level IT job applications. Use clear section headings and bullet points where appropriate.

## Output from ChatGPT Free model:

**Julian Perry R. Muñoz**

 [jprmunoz@addu.edu.ph](mailto:jprmunoz@addu.edu.ph) |  09773318487

---

### Objective

Motivated and detail-oriented Information Technology student seeking an entry-level position to apply programming, database, and networking skills while gaining practical industry experience.

---

### Education

## Bachelor of Science in Information Technology

Ateneo de Davao University — 2nd Year

---

### Technical Skills

- **Programming:** Python, Java, Rust
  - **Web Development:** HTML & CSS
  - **Databases:** MySQL, MongoDB
  - **Networking:** Basic Networking Concepts
- 

### Projects & Experience

- **Student Enrollment System**
    - Developed using Python with Object-Oriented Programming principles
    - Implemented data handling and user interaction features
  - **Shopping System (Console-Based Program)**
    - Created a functional shopping interface using programming logic
    - Focused on input validation and transaction flow
- 

### Achievements

- Academic Achiever
- 

### Additional Information

- Strong problem-solving and analytical skills
- Willing to learn and adapt to new technologies
- Team-oriented with good communication skills

## Output from Gemini 3 Fast model:

**Julian Perry R. Muñoz**

**Phone:** 09773318487 | **Email:** jprmunoz@addu.edu.ph **Location:** Davao City, Philippines

---

### OBJECTIVE

Dedicated and detail-oriented Information Technology student with a strong foundation in backend development and database management. Seeking to leverage technical skills in SQL and object-oriented programming to contribute to innovative IT projects while further developing professional expertise.

### EDUCATION

**Bachelor of Science in Information Technology** | *2nd Year Ateneo de Davao University* | 2024 – Present

- **Relevant Coursework:** Database Management Systems (MySQL), Object-Oriented Programming, Data Structures and Algorithms, Backend Development.

### TECHNICAL SKILLS

- **Languages:** Python, Java, Rust, HTML & CSS
- **Databases:** MySQL (Stored Procedures, Cursors, Triggers), MongoDB
- **Tools & Platforms:** GitHub, Google Sheets, Basic Networking
- **Development:** Backend Logic, Console-based Applications, SQL Query Optimization

### PROJECTS & EXPERIENCE

**Student Enrollment System** | *Lead Developer (Academic Project)*

- Designed and implemented a database-driven system using **Python** and **OOP** principles to manage student records.
- Developed complex **MySQL stored procedures** (e.g., sp\_enroll\_student) and triggers to automate enrollment workflows.

**Commute Davao Website** | *Requirements Analyst / Developer*

- Authored comprehensive user stories and functional requirements for a localized transit navigation platform.
- Structured database schemas to handle route mapping and stop assignments.

**Shopping System** | *Developer*

- Built a console-based program focused on inventory management and transaction processing.
- Focused on algorithm efficiency and user input validation.

## ACHIEVEMENTS

- **Academic Achiever:** Consistently recognized for high academic performance in technical and core IT subjects.
- **Project Excellence:** Successfully debugged and optimized complex database scripts involving dual cursors and nested logic.

## CORE COMPETENCIES

- Analytical Problem Solving
- Technical Documentation
- Collaborative Project Management
- Adaptability in Learning New Frameworks (Rust, MongoDB)

## Final Resume:

**Julian Perry R. Muñoz**

**Phone:** 09773318487 | **Email:** jprmunoz@addu.edu.ph **Location:** Davao City, Philippines

---

## OBJECTIVE

Dedicated and detail-oriented Information Technology student with a strong foundation in backend development and database management. Seeking to leverage technical skills in SQL and object-oriented programming to contribute to innovative IT projects while further developing professional expertise.

## EDUCATION

**Bachelor of Science in Information Technology** | *2nd Year* **Ateneo de Davao University** | 2024 – Present

- **Relevant Coursework:** Database Management Systems (MySQL), Object-Oriented Programming, Data Structures and Algorithms, Backend Development.

## TECHNICAL SKILLS

- **Languages:** Python, Java, Rust, HTML & CSS
- **Databases:** MySQL (Stored Procedures, Cursors, Triggers), MongoDB

| COMPARISON TABLE |                                                                                         |                                                                                     |
|------------------|-----------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|
| Criteria         | ChatGPT Free Model                                                                      | Gemini 3 Free Model                                                                 |
| Structure        | Only outputted what was instructed and was the same as what was prompted.               | Well structured and had initiatives to add significant sections.                    |
| Clarity          | Was very clear with its intention and was too straight to the point which made it bland | Exceeded my expectations and had created multiple initiatives.                      |
| Formatting       | The formatting was generic and rough                                                    | The formatting was professional and well-made.                                      |
| Overall Quality  | Good enough and weak-structured resume                                                  | Exceeded my expectations with well-structured initiatives, formatting, and clarity. |

## Reflection:

From what I observed, Gemini 3 Fast model had significant impact when it comes to resume making. It showed great initiative in adding different sections and adding projects that I used to consult with it on a previous prompt session making it great when it comes to memory allocation and user friendliness. On the other hand, the ChatGPT Free model made the resume far too simple despite having multiple prompt sessions wherein I consulted to him with previous projects. Which leads me to the conclusion that Gemini had a better algorithm in this case since it filled in the blanks, highlights the technical depth of my SQL work, like stored procedures and triggers, and even pulled Commute Davao project from previous chatting sessions to expand my experiences.

For the final resume, I copied everything from the Gemini model because it had more specific and technical details with better role titles. Instead of just implying I have experiences in MySQL, the AI made sure to mention things like query optimization and nested logic, which made it professional. I also implemented the “Core Competencies” Gemini added to balance out the technical agenda with acquired skills from each of the projects made. This process taught me that prompting is about more than instructing, it’s about planning which specific words and phrases can provide more context and details to create what you have envisioned. Using an AI model that can connect these contexts and details makes it a significant step in getting an output feel like it actually belongs in the industry.
